RESPONSIBLE INNOVATION MAPPING TOOL: VERSION 1.0

Our concept map (shown above) enables users to explore different values related to responsibility. We also designed a complementary app (shown below) that invites people to weigh different values in relation to each other, and to suggest more principles to help the concept map grow over time.

In future iterations we plan to refine the formula used to calculate users’ values, and to integrate the concept map and the app into a single online tool. The next version will also enable developers, consumers, stakeholders, educators to map their values in relation to other people’s, and to track how their own values change over time.

Thank you to faculty coaches and advisors: Jennifer Kuzma, David Berube, Andrew Maynard & Antony Evans.
