

## **Glycerolstock preparation**

### *Materials*

- 30% glycerol

### *Method*

1. Use an overnight grown culture (preferably without antibiotics).
2. Take 1.5 ml of the culture.
3. Spin down for 6 minutes at 8000 rpm, 4 C.
4. Discard supernatant and add 1 ml 30 % glycerol (on ice). Resuspend.
5. Put the sample in a tube with screwcap and label with *complete information*.
6. Put in a box in the -80 C freezer.
