

Glycerolstock preparation

Use an overnight grown culture (preferably without antibiotics).

1. Take 1.5 ml of the culture.
2. Spin down for 6 minutes at 8000 rpm, 4 C.
3. Discard supernatant and add 1 ml 30 % glycerol (on ice). Resuspend.
4. Put the sample in a tube with screwcap and label with *complete information*.
5. Put in a box in the -80 C freezer.
